• National Science Foundation - Major Research Instrumentation (MRI). This program seeks to improve the quality and expand the scope of research and research training in science and engineering, by providing organizations with opportunities to acquire instrumentation that supports the research and research training goals of the organization. The program emphasizes shared-use instrumentation that will enhance the capabilities of researchers both within and outside the proposing organization. Development efforts that leverage the strengths of private sector partners to build instrument development capacity at MRI submission-eligible organizations are encouraged. The MRI Program is intended to assist with the acquisition or development of a single research instrument that is, in general, too costly and/or not appropriate for support through other NSF programs. An instrument acquired or developed with support from the MRI program is expected to be operational for regular research use by the end of the award period. The program does not fund research projects, including research that uses an instrument acquired or developed with support from the program. The program does not support the operation and maintenance of facilities or centers. Proposals to the MRI Program, must be for either acquisition (Track 1) or development (Track 2), and must be for only a single, well-integrated instrument. A well-integrated research instrument means that the ensemble of equipment that defines the instrument enables a specific research experiment or type of research experiment to be undertaken; separating or removing an element or component of such an integrated instrument would preclude any experiments from occurring or succeeding. The MRI program does not support the acquisition or development of a suite of instruments to outfit research laboratories/facilities or to conduct independent experiments simultaneously. Similarly the MRI program does not fund common, general purpose ancillary equipment that would normally be found in a laboratory and/or is relatively easily procured by the organization. Further guidance on appropriate requests can be found in the MRI FAQs at http://www.nsf.gov/od/iia/programs/mri. **GRANT NEWS & UPDATES**

- **National Science Foundation Update: New PAPPG (NSF 15-1)**
  - A letter from Jean Feldman, Head of NSF Policy Office:

    Dear Colleagues,

    We are pleased to announce that a revised version of the *Proposal & Award Policies & Procedures Guide* (PAPPG), (NSF 15-1) has been issued. The PAPPG has been revised to implement 2 CFR § 200, Uniform Administrative
Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). The Uniform Guidance incorporates language from eight existing Office of Management and Budget (OMB) circulars into one consolidated set of guidance in the Code of Federal Regulations. The PAPPG also has been revised to incorporate other significant changes and clarifications unrelated to the Uniform Guidance implementation.

The PAPPG is comprised of documents relating to the Foundation's proposal and award process and consists of the:

(a) Grant Proposal Guide (GPG) for guidance on the preparation and submission of proposals to NSF; and
(b) Award & Administration Guide (AAG) to guide, manage, and monitor the award and administration of grants and cooperative agreements made by the Foundation.

As mandated by OMB, the new PAPPG will be effective December 26, 2014. In addition to the significant changes to implement the Uniform Guidance, other important revisions include:

- Acknowledgement of the implementation of NSF’s new financial system (iTRAK);
- Addition of an NSF electronic capabilities modernization status matrix to assist the community as NSF transitions our electronic capabilities to Research.gov;
- Additional compliance checking regarding the type of proposal mechanism used;
- Expansion of the budget justification section to reflect that each subaward must include a separate budget justification of no more than three pages;
- New coverage on the Ideas Lab funding mechanism;
- Description of new prior approval requirements; and
- Numerous clarifications throughout the document.

Given the extensive nature of the changes made to implement the Uniform Guidance and other important revisions, the community is strongly encouraged to review the by-chapter summary of the changes provided in the Introduction section of the PAPPG. A webinar to brief the community on the new PAPPG will be held in early January; further communication will be forthcoming.

While this version of the PAPPG becomes effective on December 26, 2014, in the interim, the guidelines contained in the current PAPPG (NSF 14-1) continue to apply. We will ensure that the current version of the PAPPG remains on the NSF website, with a notation to proposers that specifies when the new PAPPG (including a link to the new Guide) will become effective.

Please direct any questions to the Policy Office in the Division of Institution & Award Support at policy@nsf.gov, or (703) 292-8243.

- RESOURCE REMINDER: SPIN/GENIUS/SMARTS
As you may already know, InfoEd Global’s SPIN is a terrific resource that is available to the entire Dickinson community. This comprehensive web-based funding opportunity database is accessible to anybody on campus using the college’s Internet connection through the network. You can access SPIN at https://spin.infoedglobal.com/Home/GridResults.

Through InfoEd Global, the Dickinson community also has access to other valuable modules: GENIUS and SMARTS. GENIUS is a global web network and database of scientific scholarly expertise. The system contains profiles entered and maintained by scholars and researchers at leading universities and research institutions throughout the world. GENIUS serves as a registry of institutional talent and expertise to be used by industry and academia and provides a searchable resource for identifying interest and expertise for industry/university partnering, global partnering, and sponsored funding matches.

SMARTS is an electronic matching and funding opportunity notification system which provides investigators with a direct and targeted electronic link to comprehensive, current and available national and international research funding information. The investigator profile information is collected via GENIUS and used for matching with the SPIN database. Matching is conducted on a daily basis and programs are automatically emailed to individual researchers.
To create a GENIUS profile, go to the GENIUS module at http://www.infoed.org/GeniusSearch/genius.asp.

- Once there, select the “Create a New Profile” link.
- You will then be brought to a list of participating institutions. Scroll down the list and select “Dickinson College.”
- You will now enter the “New Profile Registration” screen. Here you will want to populate the information requested and create a unique user name and password (under the “Select Your Department” bullet, be sure to click “Dickinson College—School Trial—Department Trial”).
- Once you have completed these steps, you will be transported to the “Profile Summary Page.” For the purpose of creating a profile which will allow you to begin receiving the SMARTS daily email alerts containing new funding opportunities, it is recommended that you populate the following categories: 1) General; 2) Keywords; 3) Applicant Type; 4) Award Types; 5) Geographical Restrictions; 6) Sponsor Types; and 7) Locations Tenable.

Once you have populated the fields outlined above for the purpose of receiving SMARTS email alerts, you may opt to continue on and populate the other GENIUS Categories if you so choose. The GENIUS Categories will allow you to build a more comprehensive profile. The primary purpose of completing the GENIUS Categories portion is to provide individuals at other participating institutions the ability to browse your profile and contact you if they have similar research interests.

Once you have completed populating the fields required to build your GENIUS profile, it will be validated by Dickinson’s Office of Corporate, Foundation and Government Support and you will be ready to begin receiving your daily SMARTS email, alerting you of relevant funding opportunities. Once validated, you will then be able to sign into SPIN for added functionality and remote access.

During the creation of your GENIUS profile, should you encounter any problems or need assistance, please contact Ben Sweger.

If you find a funding opportunity using SPIN or through a SMARTS email, notify the CF&GS office so that we can assist you with the proposal preparation and submission processes.

Grant reviewer’s suggestion: Faculty need to ensure that their websites are up-to-date at all times. Reviewers often refer to these websites when reviewing proposals.

Think Ahead for Funding of Sabbaticals and Projects! If you are planning to take sabbatical leave or implement a project, NOW is the time to look for grant funding support. Contact the SPO Office to assist you with researching grant opportunities that match your funding needs.

ADMINISTRATORS: If you would like to have the G&O newsletter sent directly to your email account once per month, please send an email to swegerb@dickinson.edu with “SUBSCRIBE” in the subject line and we’ll add your name to our email list.

IMPORTANT INFORMATION FROM FINANCIAL OPERATIONS

Ensuring that all awards and grants are duly recognized by the College and properly reflected in the financial records is important. All award funds should go directly to the College Advancement Office so that we can process them in Banner. The Gift Recorder (Jen Acuna) enters the funds in Banner so that they are recorded in College Advancement’s records and in the financial records in accounts restricted for that award. The College Advancement and Financial Operations offices work together closely to make sure this process captures all College awards. If you receive an award, please make sure to contact one of these offices.

Cost Share Guidelines: If a proposal requires cost sharing, the commitment of institutional resources must be noted on the External Grant Notification/Clearance Form that is circulated among the senior officers of the College for approval. If the College receives the award that includes cost sharing in the approved budget, the College is obligated to record these costs in the financial records and these cost share expenses are subject to audit. Please be sure to discuss cost sharing with the Sponsored Projects Office and/or Financial Operations offices prior to submitting proposals.

Every grant or award has a unique account number (called FOAPAL) to track activity specific to that award. These numbers are assigned by Financial Operations when award letters are received. Tricia Contino tracks activity in accounts and sends quarterly spreadsheets to Financial Managers for their information and review. As a Financial Manager, you have the ability to review real time expenditures via Banner Self-Service. Please contact Miriam McMehen to inquire about Self-Service training offerings and direct specific questions about finances on awards to Tricia.

If you have recommendations about information that would be useful for managing your grants (additional analysis, open sessions, Banner training, one-on-one assistance, etc.), please contact Tricia Contino.
